TABLE SERVICE

A turntable that will earn you an A-level in vinyl jargon

← PRO-JECT RPM 1 CARBON £325

The fact that this turntable is named like an Aphex Twin song tells you it's for people who take their vinyl very seriously and will probably talk to you about it for a very long time. Now you can join in too, offering such gems as, "check out that aluminium resin tonearm!" as you show off this most glamorous, not too expensive, toy. Let's not forget the main thing, though: it will make your vinyl sound great. ★★★★★

4 out of 4 stars
